Q1.Create a class Employee and encapsulate the data members. (15)
Q2 . Execution (15)
Q3.Writeup (10)
Q4.Journal Submission (10)

```java
class Employee {
    private String name;
    private int age;
    private double salary;

    public void setName(String name) {
        this.name = name;
    }

    public void setAge(int age) {
        this.age = age;
    }

    public void setSalary(double salary) {
        this.salary = salary;
    }

    public String getName() {
        return name;
    }

    public int getAge() {
        return age;
    }

    public double getSalary() {
        return salary;
    }
}

class Main {
    public static void main(String[] args) {
        Employee e = new Employee();
        e.setName("Rutuj");
        e.setAge(19);
        e.setSalary(80000);
        System.out.println(e.getName());
```

```java
            System.out.println(e.getAge());
            System.out.println(e.getSalary());
        }
    }
```
